

# Quick-Release Tip GPS Rover Rods

SECO PN: 5125-01-YEL

This 2-meter rod is configured to allow the quick and safe release of your GPS antenna.

There's no need to screw the antenna on and off, risking damage to the antenna. The quick-release adapter stays attached to the GPS antenna. The quick-release pin features an anti-rotation notch that prevents the antenna from rotating.

The rod measures two meters and has a 40-minute circular vial, vinyl handgrip, and replaceable steel point.

Weighs 3 lb (1.36 kg).

Rover Rod can be ordered without the quick release tip.
