

Triple Mag Mount

SECO PN: 5114-01

This magnetic mount is used for mounting a GPS antenna onto a vehicle. The mag mount features a sleeker, more modern design and the stainless steel material used in construction makes it lighter than previous versions. Using a new spring design, there's now more flex to the magnets, so it now works better on curved surfaces.

The 5114-01 includes a quick release adapter (#5111-00) to allow quicker attachment of the GPS antenna.

Weights 3.4 lb (1.54 kg)
