

# Archer XF101 DGPS

The new Archer XF101 DGPS receiver for the Juniper Archer handheld computer provide superior accuracy and performance. The rugged Compact Flash adapter and smart antenna module simplify field use even in the most demanding environments.

## Key XF101 Advantages

- Crescent GPS technology now available for handheld mapping for superior sub-meter accuracy. Optional external antenna for additional accuracy
- Exclusive e-Dif is optional
- COAST technology is standard to maintain accuracy during temporary loss of differential signal
- Fully integrated, robust design matched to the host handheld PC
- Easy to use - just connect to handheld and go
- Low power consumption conserves handheld battery power.
